Subject: Bremerton Gasworks Superfund Site: Community Involvement Plan now available and other site-related news

Community Involvement Plan Now Available

Thank you for your comments on EPA Region 10's Community Involvement Plan for the Bremerton Gasworks Superfund site. The plan lays out how EPA will keep stakeholders informed and engaged as we initiate and move forward with site cleanup activities. The plan also documents community concerns and information about the site that we gathered when we held public sessions in Bremerton last September.

Find the plan on EPA's Bremerton Gasworks web page at:
<http://yosemite.epa.gov/r10/cleanup.nsf/sites/bremerton-gasworks>

The Community Involvement Plan is a "living" document, meaning it can and will be updated as the cleanup work progresses. Contact me at any time with questions, and let me know if you have any difficulty accessing the web link above. Copies of the Community Involvement Plan are available upon request.

Please share this message with anyone you know who may have an interest in cleanup activities at the Bremerton Gasworks Superfund Site.

Agreement reached between EPA and Cascade Natural Gas

EPA and Cascade Natural Gas (Cascade) have entered into a legal agreement that will have Cascade conduct investigation work at the Superfund site. The first step will be for Cascade to evaluate beach sediments near the former Gasworks site for contamination to determine if additional short-term clean-up work is necessary. This work will begin very soon. The agreement also begins the remedial investigation and feasibility study work which will ultimately determine the long-term cleanup approach for the site.
